

# PACKAGING SUPPLIER INFORMATION & MANAGEMENT SYSTEM

**Essential supplier information including product, email, phone and web details. Easy to use with extensive search facilities. Add your own supplier details and include those in searches, plus quick web links to dedicated Packaging web searches.**

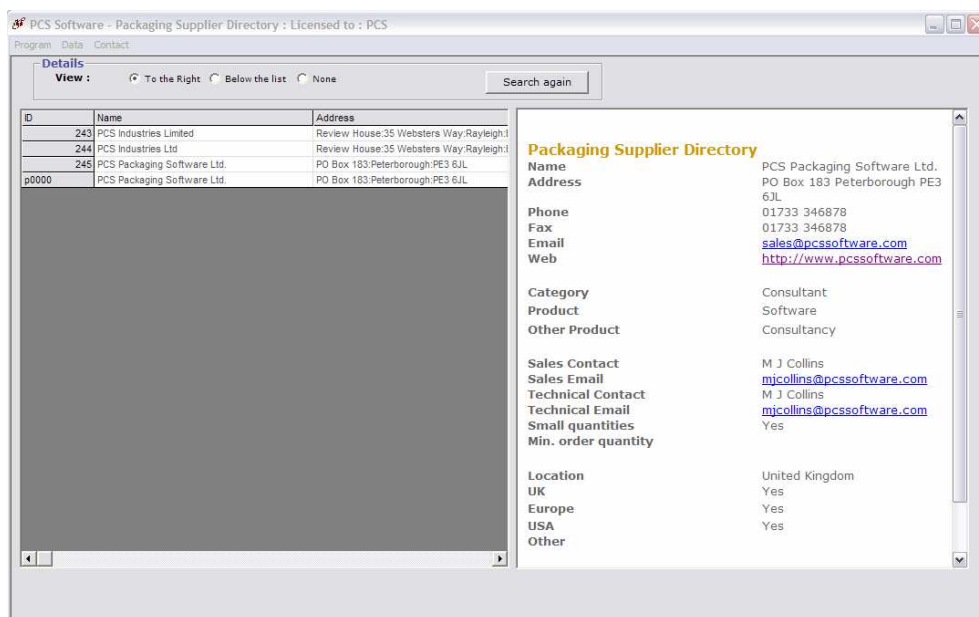

A search for Packaging suppliers via the Internet shows many sources and the results are often advertisements for products you don't need. The solution to this is at hand with the PCS Packaging Supplier Directory.

You can now search, list and view Packaging Supplier Details without the normal internet 'clutter'. Our database includes Machinery, Materials, Consultants, Co-Packers. The database is updated (by download) on a regular basis throughout the year.

Also included is our Internet Research and Information Centre which enables easy access to articles and information contained on some of the web's best Packaging related sites.

There are hundreds of UK and European suppliers listed and we now include access to the Packaging Europe/Packaging Database of over 50,000 Packaging Machinery, Material, Pack and Service suppliers. This is updated daily and contains no advertising.

You can also enter your own supplier details and build up your own personal directory. Data you enter is then listed in all searches made on the system. Easy links to web sites and email provides a system that can be used on a daily basis.

Search results summary

Company details  
(incl. phone, email, web & products)

## Features:

- Updated by download
- Fast or enhanced (selective) searches
- Online Research & Information link
- Save your own supplier details in a 'personal' data file
